Dear Dr. Thompson,

I am writing to inform you about Mr. John Carter, a 78-year-old patient under my care following his recent hip replacement surgery. Mr. Carter was admitted to our facility on March 15th, and the procedure was successfully performed without complications. Since surgery, Mr. Carter has been monitored closely. Postoperative assessments indicate adequate pain control, and he is mobilizing with assistance. His vital signs remain stable, and there are no signs of infection or other complications. He has a history of hypertension and type 2 diabetes, both of which are well-managed. During his stay, we encouraged early mobilization and provided wound care.
