Contest Format and Scoring in 2012 The 2012

AMC 12 maintained its traditional format: 25 multiple-choice questions, 75 minutes to complete the exam. Each correct answer earns 6 points. No points are deducted for wrong answers or blanks. The maximum score is 150 points. The scoring system incentivizes attempting all questions, as guessing carries no penalty. The cutoff scores for qualification to subsequent competitions vary yearly, but typically, around the top 2.5%–5% of scorers advance.

Notable Problems and Mathematical Themes in 2012

The 2012 AMC 12 featured problems that tested a wide array of mathematical concepts, often emphasizing ingenuity over extensive computation. Some problems stood out for their elegance and challenge level.

Sample Problems and Their Analysis

Problem 1 (Example): If x and y are positive real numbers satisfying $xy = 1$, what is the minimum value of $x + y$?
Solution: This classic problem involves the AM-GM inequality. By AM-GM: $x + y \geq 2\sqrt{xy} = 2$. Equality holds when $x = y = 1$.
Answer: 2
Educational Value: Introduces students to inequalities and optimization principles.

Problem 12 (Example): A regular hexagon has side length 2. What is the area of the hexagon?
Solution: Area of a regular hexagon with side length s : $\frac{3\sqrt{3}}{2}s^2$. Plugging in $s = 2$: $\frac{3\sqrt{3}}{2} \times 4 = 6\sqrt{3}$.
Answer: $6\sqrt{3}$
Educational Value: Reinforces knowledge of geometric formulas and properties of regular polygons.

Problem 20 (Example): How many integers n between 1 and 1000 inclusive satisfy that $n^2 + 3$ is divisible by 4?
Solution: We analyze the parity of n : If n is even, $n^2 \equiv 0 \pmod{4}$, so $n^2 + 3 \equiv 3 \pmod{4}$, not divisible by 4. If n is odd, $n^2 \equiv 1 \pmod{4}$, so $n^2 + 3 \equiv 4 \equiv 0 \pmod{4}$. Thus, all odd n satisfy the condition. Number of odd integers between 1 and 1000: Since 1 to 1000 inclusive has 500 odd numbers.
Answer: 500
Educational Value: Demonstrates modular arithmetic and parity considerations.

Performance Statistics and Trends in 2012

The 2012 AMC 12 saw a total participation of approximately 110,000 students across the United States and internationally. The distribution of scores highlighted several key trends:
