National Formulary of Unani Medicine: A Comprehensive Overview The National Formulary of Unani Medicine stands as a pivotal document in the realm of traditional healthcare systems in India, serving as a standardized compendium that guides practitioners, pharmacists, and researchers in the preparation, dispensing, and quality assurance of Unani medicines. Recognized officially by the government, it aims to promote uniformity, safety, and efficacy in Unani pharmacology, which has a rich historical legacy dating back over a millennium. This formulary not only bridges traditional wisdom with modern standards but also plays a crucial role in integrating Unani medicine into

mainstream healthcare.

Introduction to the National Formulary of Unani Medicine

The National Formulary of Unani Medicine (NFUM) was first developed under the auspices of the Ministry of AYUSH, Government of India, with the objective of establishing a standardized reference for Unani drugs. It encompasses detailed formulations, pharmacopoeial standards, and guidelines for the quality control of raw drugs and finished medicines. The formulary is a dynamic document, periodically updated to incorporate new research findings, technological advances, and feedback from practitioners.

Unani medicine, rooted in the teachings of Hippocrates and Galen, emphasizes a holistic approach to health and disease, based on balancing the four humors: blood, phlegm, yellow bile, and black bile. The formulary aligns with this philosophy but also emphasizes scientific validation and safety, making it an essential tool for ensuring consistency across different practitioners and manufacturers.

Historical Background and Development

Unani medicine's origins trace back to ancient Greece, but it flourished in the Islamic world and later in South Asia, especially India. Recognizing the need for standardization, the Indian government established the Central Council for Research in Unani Medicine (CCRUM) in 1979, which spearheaded the development of the NFUM. The first edition was published in 2000, and subsequent revisions have expanded and refined the content to include new formulations, pharmacological data, and quality standards. The formulary was developed through collaboration between traditional Unani scholars, pharmacologists, and regulatory authorities, ensuring that it maintains the integrity of traditional practices while adhering to scientific principles.

Structure and Content of the Formulary

The NFUM is organized systematically to serve diverse users, including practitioners, pharmacists, and researchers. Its main components include:

- Introduction and General Guidelines:** Principles of Unani pharmacology, standardization procedures, and quality assurance protocols.
- List of Raw Materials:** Botanical, mineral, and animal origin drugs, with their botanical names, local names, morphological descriptions, and procurement standards.
- Formulations:** Detailed recipes for classical and proprietary medicines, including dosage forms, preparation methods, and storage instructions.
- Pharmacopoeial Standards:** Specifications for purity, potency, and microbial contamination, often including tests like ash value, extractive value, and organoleptic evaluation.
- Quality Control and Standardization:** Methods for testing raw materials and finished products, including chromatographic fingerprinting, physicochemical tests, and bioassays.
- Appendices and Annexures:** Additional data, such as toxicity profiles, pharmacological activities, and references to classical texts.

This comprehensive layout ensures that each aspect of Unani medicine—from raw material identification to finished product testing—is covered thoroughly.

Key Features and Highlights

The NFUM incorporates several features that enhance its utility and reliability:

- Standardization of Raw Drugs:** Detailed identification parameters, including microscopic, macroscopic, and chemical characteristics, ensure consistency.
